ABSTRACT

This statewide fact book contains general statistical information about public community, technical, and state colleges in Texas. The book is divided into 11 sections: (1) annual enrollment; (2) fall enrollment; (3) first-time-in-college enrollment; (4) remediation; (5) first-time-in-college-cohort tracking analysis; (6) transfer and retention; (7) placement data; (8) contact hours/semester credit hours; (9) degrees/certificates awarded; (10) faculty and staff; and (11) financial data and service area population. Each section begins with a statewide summary and is followed by detailed institutional information presented in tables. The statistics presented show that: (1) community and technical college (CTC) enrollments during 1999-2000 were comprised of 41% academic students, 33% technical students, and 26% continuing education students, 54% females, 55% whites, 26% Hispanics, 12% blacks, and 7% other; (2) during the academic year 1999-2000, 36% of CTC students enrolled for six semester credit hours or less, 69% enrolled for 15 hours or less, and 9% enrolled for more than 27 hours; (3) during the past 11 years, enrollment in CTCs statewide has increased 18%, from 379,514 in fall 1990 to 447,998 in fall 2000; and (4) in fall 2000, 72% of freshman and sophomore enrollment in higher education were in CTCs. (Contains 183 tables and one appendix.) (KP)

INTRODUCTION

About the Statewide Factbook

The Statewide Factbook contains general statistical information about public community, technical, and state colleges in Texas. It is important for the reader to be aware that data presented in these publications may differ slightly from statistics found in other Coordinating Board reports. Such variances may result from differences in the reporting period covered (semester, annual academic year), the student base included (credit, noncredit, credit/noncredit combined), or methodology.

Organization of the Factbook

Every section of the report begins with a statewide summary, including major observations to be derived; most of the statewide summaries are presented graphically. Following the statewide summary in each section, detailed institutional information is presented in tables.

Explanatory Notes A-1

Section I:

Annual Enrollment

Annual Enrollment

Annual Enrollment reflects the total number students attending community and technical colleges during an academic year. It should be noted that a person may attend (be a student) more than one institution during an academic year. Although the enrollments for institutions represent unduplicated counts for the academic year, aggregation of enrollments for all institutions usually results in some duplicated headcounts at the statewide level.

- Academic students accounted for 41 percent of community and technical college (CTC) enrollments during 1999-2000, while technical students accounted for 33 percent and continuing education students for 26 percent.
- More females (54 percent) than males (46 percent) attended CTCs during 1999-2000 academic year.
- While the majority of student enrollments are White (55 percent), that share continues to shrink as Texas' demographics change. Hispanics now make up one-fourth of CTC student enrollments (26 percent), while Blacks represent about one-eighth (12 percent). Other ethnic groups represent about 7 percent of CTC student enrollments.
- In-district residents account for somewhat less than half of CTC student enrollments (48 percent).
- Forty percent of CTC students were identified in a special populations category.
- More than one-third (36 percent) of CTC credit students enrolled for six semester credit hours (SCH) or less during academic year 1999-2000. Over two-thirds (69 percent) enrolled for 15 SCH or less. Only 9 percent of credit students enrolled for more than 27 SCH during academic year 1999-2000.
- Among non-credit students, contact hours were concentrated at the extremes -- most students enrolled either for more than 55 contact hours, or between eight and 23 contact hours. However, almost 10 percent enrolled for fewer than eight contact hours.

Section II:

Fall Enrollment

Fall Enrollment

Fall enrollment is defined as the number of students who are attending classes as of the census date (12th class day) of the fall term and who are reported on the Coordinating Board's CBM001 report. During the past 11 years, enrollment in community and technical colleges statewide has increased 18 percent, from 379,514 in fall 1990 to 447,998 in fall 2000. Fall enrollment figures are the numbers most often used when enrollment is discussed.

- Seventy-two percent of freshman and sophomore enrollment in higher education were in Community and Technical Colleges.

- Student enrollment among Whites, which had been declining in recent years, rebounded somewhat during the 1999-2000 academic year. Enrollment among Blacks and Hispanics showed substantial, consistent increases through the 1990s and into the 1999-2000 academic year. Black student enrollments increased 38 percent during the 11-year period ending 1990-2000, while Hispanic student enrollments increased 67 percent during the same period.

- While the proportion between male and female enrollments remained stable over the 11-year period, both genders enjoyed steady increases in enrollments during 1999-2000.

- Academic majors constitute a larger share of total enrollments than technical majors; however, that margin has been decreasing in recent years.

It is important to note that community and technical colleges also offer courses that begin after the census date. Although, some students take such courses during the fall term, they are not counted toward the enrollment of that term; rather, they are reported as "flexible entry" students in the following spring term.

Section III:

First-Time-In-College Enrollment

Fall Enrollment of First-Time-in-College Students

First-Time-in-College (FTIC) enrollments reflect the number of students enrolling in higher education for the first time. It is often used as the basis for defining a cohort or group of students for tracking purposes. Such cohorts are used to identify the length of time it takes students to graduate or to determine the proportion of new students who obtain a degree or transfer to another institution within a given time frame.

- In fall 2000, academic majors accounted for 61 percent of total FTIC enrollments, and technical majors comprised 39 percent of FTIC enrollments. This compares to 59 percent for academic majors in fall 1999 and 41 percent for technical majors in fall 1999.
- For gender and ethnicity, the representations for FTIC students in fall 2000 remained the same as fall 1999.
- In-district students accounted for 59 percent of all enrollments annually, while out-of-district accounted for 32 percent, non-resident six percent, and tuition exemption waived three percent.
- In fall 2000, 48 percent of FTIC students were full-time, 31 percent enrolled in 6-11 semester credit hours (SCH), and 21 percent enrolled in only 1-5 SCH.
- The proportion of FTIC enrollments identified as special populations students in fall 2000 was 53 percent. Much of this representation among FTIC students was due to a large percentage being identified as academically disadvantaged (44 percent).

Section IV:

Remediation

First-Time-in-College Students Receiving Remediation

Community and technical colleges play a major role in assuring that students have the academic skills necessary to take college-level courses. In fall 1999, 45,419 first-time-in-college students received remediation instruction.

- In fall 1999, 41 percent of all first-time-in-college students attending a public community or technical college enrolled in one or more remedial courses.
- Students declaring technical majors had the same rate of remedial course enrollment (41 percent) as those declaring academic majors (41 percent).
- Females were somewhat more likely to be enrolled in remedial courses (42 percent) than were males (40 percent).
- White students enrolled in remedial courses 32 percent of the time, compared to 57 percent for Blacks and 54 percent for Hispanics.
- Full-time students received remediation 48 percent of the time, compared to 43 percent of part-time students who took 6-11 semester credit hours (SCH), and 15 percent of students who took 1-5 SCH.

First-Time-In-College Cohort Tracking Analysis

First-Time-in-College Cohort Tracking Analysis

Student persistence is an important factor in determining the effectiveness of higher education. Persistence patterns in community and technical colleges reflect a high degree of volatility as some students enroll in order to complete only a few courses, while others may continue at the same institution or transfer to another institution.

Only state-funded public institutions report student-level data to the Texas Higher Education Coordinating Board. As a result, student tracking is limited to only those students attending public institutions in Texas. Hence, students who transfer to private or out-of-state colleges or universities are not included in these data.

- The longitudinal Six-Year Student Tracking Analysis provides information on the cohort of fall full-time First-Time-in-College students. Of the 40,050 students in the fall 1994 cohort, 12 percent had received baccalaureate degrees by the 1999-2000 academic year. Nine percent of the students received associate degrees, 5 percent received certificates, and 74 percent had not received any award by summer 2000.

- Receipt of an associate degree or certificate was more likely for technical students (24 percent) than for academic students (13 percent). However, baccalaureate attainment was more likely for academic students (16 percent) than for technical students (5 percent).

- Of the total cohort, 29 percent had attended public four-year institutions at some point during the six-year period. Transfer to a university was more likely for academic students (36 percent) than for technical students (16 percent), as it was for associate degree recipients (52 percent) than for certificate recipients (6 percent).

- Of the 11,700 students who transferred to public four-year institutions, 42 percent had received baccalaureate degrees by summer 2000.

- For the fall 1994 cohort, baccalaureate attainment was more likely for academic transfer students (44 percent) than for technical transfer students (30 percent). Baccalaureate attainment was also more likely for transfers with an associate degree (45 percent) than for transfers with a certificate (12 percent).

Transfer and Retention

Transfer and Retention

Student retention and transfer are important factors in determining the effectiveness of higher education. Retention and transfer patterns in community and technical colleges reflect a high degree of volatility as some students enroll in order to complete only a few courses, while others may continue at the same institution or transfer to another institution.

Only state-funded public institutions report student-level data to the Coordinating Board. As a result, student tracking is limited to only those students attending public institutions in Texas. Hence, students who transfer to private or out-of-state colleges or universities are not part of these data.

- Retention can be determined by comparing fall enrollment to the subsequent spring enrollment. Of the First-Time-in-College (FTIC) students enrolled during fall 1999, 69 percent re-enrolled the next spring. The FTIC fall-to-spring retention rate for students in academic majors (71 percent) was higher than for that of students in technical majors (66 percent). The rate for females (71 percent) was higher than that of males (66 percent). The rate for Hispanics (71 percent) was higher than that of Whites (69 percent), other ethnicities (70 percent for Asian, Native American, International, and unknown), and Blacks (63 percent). Finally, the rate was higher for full-time students (78 percent) than for part-time students enrolled at least half-time (64 percent), and part-time students enrolled less than half-time (48 percent).

- Transfer can be determined by comparing fall enrollment to the subsequent fall enrollment, realizing that graduation may influence this measure. Of the students enrolled during fall 1999 and graduated by summer 2000, 16 percent re-enrolled at the same institution during fall 2000; 15 percent transferred to a university; 2 percent transferred to another community or technical college; less than 1 percent concurrently enrolled in a university and a community or technical college; and 66 percent could not be located in Texas public higher education. The percentages for all gender and ethnic groups are similar. However, graduates of academic programs were more likely to transfer to a university (35 percent) than were graduates of technical programs (6 percent). Similarly, it was more likely that graduates could not be located in higher education if they were technical graduates (76 percent) than if they were academic graduates (46 percent).

Placement Data

Placement Data

Key outcome measures for community and technical college students include workforce participation and transfer to other colleges and universities. The process used to collect this data is the Coordinating Board's Automated Student and Adult Learner Follow-up System (ASALFS), which tracks students who transfer to Texas public colleges and universities or who obtain in-state employment that is covered by the Texas Workforce Commission Unemployment Insurance Quarterly Reports. Typically, about 85 percent of students are located through the automated data-matching process. This process does not locate students who move out-of-state, transfer to private colleges or universities, are self-employed, or are employed in a variety of federal, military, or civil service areas.

- Of the 1999-2000 graduates (associate degree and certificate recipients), 84 percent were found to be employed. Transfer data indicate that 33 percent of graduates continued to attend Texas public colleges or universities. For both categories combined, 90 percent of the graduates were located in either employment or additional education through the ASALFS process.

- Of the 1999-2000 cohort, 12 percent of the graduates of academic programs transferred to other colleges but were not located in employment directly after receiving their awards. For technical and workforce continuing education award recipients, 4 percent transferred to other colleges and were not located in employment directly after receiving their awards. For graduates who did not transfer, 69 percent of the technical and workforce continuing education award recipients were located in employment compared to 33 percent of the academic award recipients. However, 90 percent of graduates of academic programs and 92 percent of technical and workforce continuing education award recipients were located in either employment or additional education through the ASALFS process.

Since about 10 percent of graduates are not located through the ASALFS process, the CB116 Supplemental Follow-up process provides the community and technical colleges an opportunity to survey the missing graduates. Typically, an additional 5 percent of the students are located through the supplemental survey process.

Section VIII:

Contact Hours/ Semester Credit Hours

Contact Hours/Semester Credit Hours

Community and technical colleges receive state appropriations through a funding formula based upon contact hours. Technical and continuing education programs that train students for the workforce are state-funded. Developmental education is also state-funded.

Community colleges may provide courses within their assigned service areas, which often are larger than their taxing districts (out-of-district courses are outside of the taxing district). Students pay differential tuition based upon their legal residence (out-of-district tuition is paid by students outside of the taxing district).

- During academic year 1999-2000, 33 percent of all contact hours were paid for by out-of-district tuition, but only 15 percent of all contact hours were taught out-of-district. Seventy-three percent of the contact hours paid for by out-of-district tuition were taught in-district.

- At nine of the community and technical colleges, 50 percent or more of all contact hours were taught out-of-district. Eight of the colleges taught more than 13 percent of all contact hours at a correctional institution. Three of the colleges taught more than 16 percent of all contact hours at a military base or other educational institution. Seven of the colleges taught more than 4 percent of all contact hours via instructional telecommunications.

- At 25 of the colleges, 50 percent or more of all contact hours were paid for with out-of-district tuition (including non-resident and tuition exemption/waivers). Sixteen of the colleges have an out-of-district index score greater than 50, indicating substantial reliance upon out-of-district tuition and courses.

- From academic year 1994-1995 to 1999-2000, there has been steady growth in total contact hours, rising from 190 to 208 million. Academic contact hours account for 61 percent of all contact hours. Technical contact hours represent 30 percent, while workforce continuing education contact hours represent 9 percent of the total.

- Developmental education was about 12 to 13 percent of the total contact hours, full-time equivalent, and semester credit hours during academic year 1999-2000.

- Although the statewide contact hour completion rate has been stable from fall 1997 to fall 2000 at about 82 percent, individual institutions are moving in both directions away from the statewide average. During this time period, the percentage of institutions with contact hour completion rates less than 81 percent remained steady at 26 percent. The percentage of institutions with completion rates from 81 to 90 percent fell from 64 to 56 percent. Finally, the percentage of institutions with completion rates greater than 90 percent rose from 11 to 19 percent.

Note: The institution total contact hours are summarized from different sources and may not match due to reporting variances within tolerances.

*Out-of-District Tuition Status includes non-resident students and students granted tuition exemptions/waivers.

**Index values can range from 0 to 100 and represent the relationhip between an institution's Out-of-District course offerings and enrollment. The index value is based upon the sum and the difference of the Out-of-District percentages, with equal weight given to both the sum and the difference.

Degrees/Certificates Awarded

Degrees/Certificates Awarded

Texas public community and technical colleges award academic and technical associate degrees, as well as technical and workforce continuing education certificates. Data on graduation is reported once each academic year and includes awards made from the previous fall through the most recent summer terms.

- Of the 40,643 degrees and certificates awarded in 1999-2000, 61 percent were associate degrees and 39 percent were certificates. Technical awards constituted 69 percent, academic awards 29 percent, and workforce continuing education awards 2 percent of all degrees and certificates awarded. Females earned 58 percent of degrees and certificates and males earned 42 percent. Whites earned 57 percent of degrees and certificates, Hispanics earned 25 percent, Blacks earned 13 percent, while other ethnicities (Asian, Native American, International, unknown) earned 5 percent.

- The total number of degrees and certificates awarded grew 50 percent from 1989-1990 to 1999-2000. Technical certificates accounted for 56 percent of the growth over the decade, academic associate degrees accounted for 30 percent, and technical associate degrees accounted for 11 percent, while academic and workforce continuing education certificates contributed 3 percent of the growth.

- Females awarded certificates accounted for 30 percent of the growth, while males awarded certificates accounted for 29 percent. Females awarded associate degrees accounted for 31 percent of the growth over the decade, and males awarded associate degrees contributed 10 percent.

- Whites awarded certificates accounted for 28 percent of the growth, Hispanics awarded certificates accounted for 14 percent, Blacks awarded certificates accounted for 11 percent, and other ethnicities awarded certificates contributed 5 percent. Whites awarded associate degrees accounted for 9 percent, Hispanics awarded associate degrees accounted for 20 percent, Blacks awarded associate degrees accounted for 8 percent, and other ethnicities awarded associate degrees accounted for 5 percent of the growth over the decade.

Faculty and Staff

Faculty and Staff

Community and technical college faculty are more diverse than in many other professions, but lag behind the representative diversity of their students. The typical faculty member is an older degreed professional working part-time teaching one or two classes.

- Of the 27,455 faculty members who taught during the 1999-2000 academic year, 52 percent were male, 48 percent were female, 79 percent were White, 12 percent were Hispanic, 6 percent were Black, and 3 percent were other races and ethnicities.

- The average faculty member was 52 years of age, and had taught for eight years, including three years at their current college. At six colleges, the faculty averaged 10 or more years teaching at that institution.

- Faculty members holding a doctorate comprised 12 percent of all faculty, 17 percent of full-time faculty, and 10 percent of part-time faculty. Masters recipients represented 53 percent of all faculty, 59 percent of full-time faculty, and 50 percent of part-time faculty. Similar percentages for other degree holders were: Bachelor (19, 15, 21); Associate (6, 6, 6); Certificate or less (2, 2, 2); and no degree (2, less than 1, 3).

- Sixty-nine percent of faculty members were part-time, while 31 percent were full-time for the entire year. At eight of the community colleges, 80 percent or more of the faculty were part-time. Part-time faculty taught 42 percent of the instructional load (as represented by full-time equivalent calculations for the entire year) compared to 58 percent for full-time faculty. At 16 of the community and technical colleges, part-time faculty taught 50 percent or more of the instructional load. At 12 of the colleges, full-time faculty taught 80 percent or more of the instructional load.

- During fall 1999, 22,981 faculty members taught at least one course. Each faculty member averaged 3.2 courses, 136 semester credit hours, and 2,761 contact hours. The majority of these faculty taught one or two courses.

- For the same semester, 10,711 faculty members were assigned to teaching for more than half-time, averaging 4.8 courses, 210 semester credit hours, and 4,318 contact hours. A third of these faculty members taught three or less courses, a third taught four or five courses, and a third taught six or more courses.

- The average faculty salary for full-time faculty during Fiscal Year 2001 (9 months) was $40,770. The lowest salary was $11,136 and the highest salary was $73,660.

Note: Faculty numbers are headcounts. Full-Time Equivalent (FTE) numbers are a proxy for course load (derived from CBM008 percent of time). Index for part-time represents the institution's reliance upon part-time faculty. The index may range from 0 to 100, and is derived from the average of the percent part-time faculty and the percent part-time FTE.

Financial Data and Service Area Population

Community colleges receive financial support from local taxing districts, state appropriations, and federal financial assistance. The Lamar State Colleges and the Texas State Technical Colleges rely upon additional state appropriations in lieu of local taxes. The amount of each type of financial support received by a community or technical college may vary widely depending upon the size of the institution, the wealth of the local community, and the wealth of the student population.

- The state of Texas community college district local tax base (net assessed valuation) totaled $524 billion in fiscal year 2000. The tax base at individual districts varied from $60 million to $109 billion, with a median of $3 billion. The tax rate per 100 dollars of valuation ranged from 2 to 34.8 cents, with a median of 12.4 cents. About half of the districts assessed a tax rate between 9 and 16 cents.

- The taxes collected totaled $511.1 million, and varied from $4 million to $63.6 million, with a median of $4 million. Much of the variability in local tax support can be attributed to the size of the institution. Adjusting the total taxes collected by the number of full-time equivalent (FTE) students narrows the differences among districts. The total taxes collected per FTE varied from $86 to $4,826, with a median of $1,415. About half of the districts collected taxes between $501 and $1,500 per FTE. Five districts collected taxes less than $250 per FTE.

- Federal financial assistance totaled $361.2 million, and ranged from $0.6 million to $50.2 million, with a median of $3.8 million. Pell grants to students accounted for 56 percent of the total. Vocational education basic grants were 8 percent of the total, while Tech-Prep grants were 2 percent, and other assistance totaled 34 percent. Twelve districts (24 percent) did not receive a Tech-Prep grant. The average FTE student received $1,168 in federal assistance, composed of a $653 Pell grant, a $97 Vocational education basic grant, a $24 Tech-Prep grant, and $394 in other assistance.

- Education and General Fund (E&G) expenditures at Texas community and technical colleges totaled $2 billion, and ranged from $4.5 million to $214 million, with a median of $20 million. Over half of the colleges expended between $11 and $30 million in E&G funds. Adjusting the E&G expenditures by the number of full-time equivalent (FTE) students results in a range of $3,878 to $10,208, with a median of $6,964. Over 65 percent of the community and technical college districts/systems expended between $6,000 and $8,000 in E&G funds per FTE. One district/system expended less than $4,000 and four district/systems expended more than $9,500 in E&G funds per FTE.

STATEWIDE SUMMARY	19,651,869	12,650,008	1.55

Note: All or part of 5 counties are not assigned to a college service area accounting for 389,205 people. Difficulties calibrating service areas left 3,068 additional people unassigned. When added to the service area total for all colleges, these figures equal the 1999 Census population estimate for Texas (20,044,141).

Method for determining service area and taxing district populations for CCs:

1) 1999 population estimates were determined for each county in Texas, using Bureau of Census data.

2) Service areas were defined as provided by S.B. 397 (74th Legislature).

3) Taxing districts were provided by TACC (as reported to them by each CC district).

4) Where a county was completely in a service area or taxing district, its total population was included in the aggregate population for an institution.

5) When only part of a county was included in a service area or taxing district, only that part/portion of the county population circumscribed by the service area/tax district was included in the aggregate population for the institution.

Explanatory Notes

Workforce education students are those with type majors 2 (technical), 3 (tech-prep), or 4 (continuing education).

Credit academic: type major 1 (academic) on CBM001.

Credit technical: type major 2 (technical) or type major 3 (tech-prep) on CBM001.

Non-credit workforce education: type major 4 (continuing education) on CBM00A.

Annual Enrollment Unduplication Process: CBM001s from fall 1999, spring 2000, summer I 2000, summer II 2000 and CBM000As from the 1st quarter 1999, 2nd quarter 2000, 3rd quarter 2000, 4th quarter 2000 were combined into one file and unduplicated based on unique FICE/SSN combination. For Type Major, Tech-Prep (3) supercedes Technical (2), which supercedes Continuing Education (4), which supercedes Academic (1). Flex students reported in each semester are included. Where multiple records for a specific student have the same highest value for Type Major, the record with the most recent semester was used and a regular enrollment record was used over a flexible entry record.

First-time-in-college (FTIC): A student with the FTIC code (000001 – CBM001 Item # 9) in fall 2000, including those with who were reported the previous Summer (summer I 2000 or summer II 2000) with the FTIC code who returned to the same institution in fall 2000 regardless if they were coded as an FTIC in fall 2000. Flex students were excluded from FTIC cohorts.

Index for Part-Time Faculty: ((((Part-Time Faculty)/(Total Faculty)) + ((Part-Time FTE)/(Total FTE)))/2) x 100
